Figma

An aspiring **frontend developer** gaining expertise in web technologies, with a strong foundation in **computer science, software development, UX design**, and **research**. With experience in teaching, software development, and user experience, I bring a unique blend of technical expertise and user-centered thinking. Passionate about building engaging, responsive, and accessible web applications, **I am currently advancing my skills through a frontend development diploma**. My background in human psychology and teaching methodologies enhances my ability to understand user behavior, collaborate effectively, and create intuitive digital experiences. I thrive in **problem-solving**, continuous learning, and delivering high-quality solutions, making me eager to contribute to innovative frontend development teams. **I'm a hard worker and dedicated with a passion for learning.**

Experience

CS teaching assistant
.NET freelance developer
UX design and research
Frontend development diploma

Computer Science Teaching Assistant / Cairo University

2010 - 2013

Delivered lectures, conducted tutorials, and assisted students in understanding core computer science concepts.

Guided students in programming, data structures, and algorithms, helping them develop problem-solving skills.

Conducted research, graded assignments, and supported faculty members in curriculum development.

.NET Freelance Developer / OG tech

2013 - 2015

Developed and maintained web applications using .NET technologies, delivering scalable and efficient solutions.

UX Designer & Researcher / Over-Coffee-Solutions, Tremoloo

2016 - 2017, 2021 - 2023

Led UX research and design processes to create intuitive and user-friendly digital experiences.

Conducted user interviews, usability testing, and data analysis to inform design decisions.

Designed low fidelity wireframes and prototypes.

Education

Frontend Development Student / On going diploma
2006 - 2010

Currently undertaking a comprehensive frontend development diploma to deepen expertise in modern web technologies.

Gaining hands-on experience with HTML, CSS, JavaScript, and popular frameworks such as React.

Working on real-world projects to build responsive, accessible, and user-friendly web applications.

Engaging in collaborative development using Git and version control.

Computer Science BSc / Cairo University
2006 - 2010

Earned a strong foundation in computer science, algorithms, and software development.

Studied core subjects including data structures, operating systems, databases, and artificial intelligence.

Developed problem-solving and analytical thinking skills through coursework and hands-on programming projects.

Gained experience in multiple programming languages and software development methodologies.

Completed a postgraduate diploma (2011) to further enhance expertise in advanced computing topics.
